

## **Multilaterals, International Policy and Strategy Division**

The objective of Multilaterals, International Policy and Strategy Division is to expand the outreach of FICCI by collaborating with multilateral and bilateral agencies in a focused way and by creating joint engagements in line with the identified priorities of the partner institutions. The division would evolve as the first point of contact for multilateral and bilateral agencies interested to work with different divisions of FICCI as well as for connecting various in-house verticals with global and regional institutions. Some of our partner institutions include ADB, World Bank, IMF, UNDP, KAF, FES, FNST and GIZ. The Division also contributes to evolving private sector's perspective on global and regional public policy and economic issues. The Division also works as the central team in FICCI's International Department and supports coordination of key engagements including the work of FICCI's International Council.
