Corporate Profile

Mitsui & Co., Ltd., together with its subsidiaries and associated companies, is a general trading company engaging in a wide range of global business activities. Our activities include general worldwide trading of various commodities, arranging financing for customers and suppliers in connection with our trading activities, organizing and coordinating international industrial projects, participating in financing and investing arrangement, assisting in the procurement of raw materials and equipment, providing new technologies and processes for manufacturing, and coordinating transportation and marketing of finished goods.
Mitsui has 155 offices and trading subsidiaries in 67 countries, including 12 in Japan and 5 in India.

Business in India

Mitsui looks forward to establishing sustainable business platforms in India to capture growth opportunities as we pursue our business activities, which will include the following:

【Investment】

Mitsui aims at penetrating deeper into basic industries in India through diversification of supply sources. In addition, by making investments with strategic partners and/or integration of high-quality Japanese services and technologies, Mitsui will try to become a local entity supplying first-class products/services competitively.

【Trading】

Mitsui looks for competitive products in India for export through Mitsui's global network and highly-trained experts. To the East, we look to Asian markets, and to the West, to Middle Eastern and African markets.

【Infrastructure】

Mitsui proposes to strengthen India by improving local infrastructure, including transportation, logistics, electricity & water supply, etc. by utilizing Mitsui's global experience and networks.

川崎重工業株式会社

川崎重工は、国内外の100に及ぶ関連企業とともに“技術の企業集団”川崎重工グループを形成しています。

技術の歴史は100年を越え、磨きあげてきた先端技術をもって新たな価値を創造し、社会の発展に貢献するという理念のもと、陸・海・空はもとより、遥かな宇宙から深海にまで、多彩な製品を送り出しています。

航空機はもちろん人工衛星まで手がける航空宇宙事業。LNG、LPGなどのガス船や潜水艦を得意とする造船事業。
新幹線、ニューヨーク地下鉄など、世界に製品を送り出している鉄道車両事業。ガスタービンやバイオマス発電で実績を重ねるエネルギー関連事業。
さらに各種プラントや環境関連設備、産業機械、産業用ロボット、土木建設機械、鉄鋼構造物など、幅広いエンジニアリング技術を必要とするさまざまな事業。そして、Kawasakiブランドで知られるモーターサイクル、ATV、ジェットスキー®、汎用ガソリンエンジン。総合エンジニアリング企業として、また、世界的なレジャー製品メーカーとして、川崎重工は、他に類を見ないユニークで幅広い事業を展開しています。

Kawasaki Heavy Industries, Ltd.

The Kawasaki Heavy Industries Group manufactures a vast array of products that demonstrate technological mastery of the land, sea, air and outer space. Its aerospace business offers various products ranging from aircraft to satellites, while the shipbuilding business provides LNG and LPG carriers, submarines and other vessels. Japan's Shinkansen trains and New York City's subway cars are just two examples of its rolling stock business' famed global offerings, just as gas turbines and biomass power plants headline the energy plant and facilities business. The Group also supplies many products that demonstrate its expertise in engineering, such as industrial plants, environmental protection facilities, industrial equipment, construction machinery and steel structures. The Group's unique ability to cover a broad range of businesses is also demonstrated by such worldfamous consumer products as Kawasaki-brand motorcycles, ATVs and Jet Ski® personal watercraft.

Profile

The 77 Bank, Ltd., was founded in 1878 as Japan's 77th national bank. Headquartered in Sendai - the capital of Miyagi Prefecture – Miyagi Prefecture, the primary base of operations for The 77 Bank, is located in the southeast corner of the Tohoku Region. The prefecture is an important crossroads linking Tohoku Region to Tokyo, the nation's capital.

In 1989, Sendai, the prefectural capital, became the 11th city in Japan specially designated by ordinance. The higher profile encouraged major national businesses and organizations, including government agencies, to set up branches and offices in Sendai, thereby turning the city into an urban hub of Tohoku Region. In terms of major economic indicators, such as population, gross prefectural product and retail trade amount, Miyagi Prefecture is ranked around 15 among Japan's 47 prefectures. Miyagi Prefecture is working steadily to establish an industrial infrastructure, such as an improved transportation network to connect the region better to other prefectures as well as to places abroad.

The 77 Bank is the largest in Tohoku Region, with its branch network covering this area in northern Honshu, Japan's largest island. Based on its philosophy, The 77 Bank continues to strengthen its business foundation and enhance its management quality in order to be the "best regional bank", one that grows along with its customers and is commited to the sustainable development of the region. The 77 Bank seeks to be a bank that provides the utmost value to shareholders, clients and the community as a whole and one that supports the local activities of people and businesses. Our mission, as a regional financial institution, is to contribute to regional economic development through the timely and accurate provision of financial services geared to the needs of the customers. Our efforts have earned us the support of customers, boosting our regional share of deposits and loans to the highest level among Japanese regional banks.

As of March 31, 2011, The 77 Bank had capital of ¥24.6 billion, 141 domestic branches and 1 representative office(Shanghai), 2,904 employees.

Overview of SMK Corporation for Economic Mission in India

SMK is an electronic component manufacturer that handles connectors, remote controls, switches, touch panels, and other items.
The company was established in 1925, and has operated successfully as a manufacturer of components for over 86 years since its foundation.

Driven by a firm belief since our establishment that "good parts make good products", we have been constantly receptive to the requests of our customers and pursued total manufacturing that stays one leap ahead of the times.

Parts developed, produced and shipped by SMK have been used in a variety of familiar products; such as digital home appliances including flat-screen televisions and audio equipment, mobile phones including smartphones, automobiles, computers, home appliances, and photovoltaic power generation modules; contributing to the lives and business of people all over the world. We have also focused on CSR management, actively working towards raising the corporate awareness of each and every employee as well as formulating a Corporate Behavior Charter from early on.
Our contribution to society has been to establish the Showa Ikeda Memorial Foundation to support promising students as well as contributing to social development through welfare activities.
English and Japanese are spoken as corporate languages and we have been active in the employment of local people such as those in China, Europe and USA. Our "transnational" management style supports the development of global business.

SMK aims to raise the value of all employees and to improve SMK's value as a company.

＜企業概要　丸紅（株）＞

Marubeni Corporation

Marubeni Corporation is a general trading company (*sogo shosha*) , with 119 branches, offices, and local subsidiaries spanning 69 countries and regions around the world, as well as 9 business sites in Japan and 425 operating companies worldwide, employs a multinational workforce of approximately 30,000 people.

Marubeni is involved in the handling of products and provision of services in a broad range of sectors. These areas encompass importing, exporting and offshore trading, as well as transactions in the Japanese market, related to food materials, food products, textiles, materials, pulp and paper, chemicals, energy, metals and mineral resources, transportation machinery, power projects and infrastructure, plants and industrial machinery, finance, logistics and information industry, and real estate development and construction.
Additionally, Marubeni conducts business investment, development and management on a global level.

Marubeni is operating under a three year medium-term management plan called SG-12, and this plan has 4 key measures, “a top management-led human resources strategy”, “priority allocation of management resources”, “to accelerate business in overseas market”, and “strengthen its financial base and upgrade risk management”. Regarding the priority allocation of management, key fields are “natural resources”, “infrastructure”, “the environment” and “essential living commodities”.

Tokyo Small and Medium Business Investment & Consultation Co.,Ltd (SBIC East Japan)

Tokyo Small and Medium Business Investment & Consultation Co.,Ltd (SBIC East Japan) is a government implementation agency that was established based upon the Small and Medium Business Investment Company Act (enacted June 10, 1963), with the objective of achieving sufficient equity capital and healthy growth environment for small and medium businesses.

In Japan, small businesses not only account for some 99% of all business establishments, they also generate 70% of total employment. If a small business is to strengthen its foundation and continue to grow, a solid financial position is vital, and in particular, an increased capital base. With only limited profits, however, many small businesses have to look beyond earnings, only to find that capital procurement is neither smooth nor fast. To look elsewhere for capital, they discover, is to risk losing management control — an unacceptable alternative for many family-owned businesses. And unlike large corporations, they cannot raise funds in securities markets.

To alleviate these difficulties, the Japanese government set up 3 Small and Medium Business Investment & Consultation companies (SBICs) with both investment and advisory roles. SBICs subscribe for shares or bond(※1) issues when a small business(※2) seeks to increase its capital base. With the relationship established, we also offer consulting services to our client companies.

3 SBICs were established in the cities of Tokyo, Nagoya and Osaka. From its head office in Tokyo, SBIC East Japan is responsible for the eastern part of the country, where almost half of all Japanese business establishments are based.

(※1) bond with a right to subscribe for new shares

(※2) Enterprises eligible for investment:

① Joint stock companies with capital up to/including ¥300 million

② All categories of business

ATENA CORPORATION

Atena Corporation is a customer information processing company specializing in direct mail and is ranked as one of the top three firms in the Japanese direct mail service industry. In terms of specific business classification, Atena falls into the category of general advertisement agency service industry in the field of direct mail.
The company also manufactures and sells welfare/nursing-related equipment and provides nursing care services. The company's activities in this field stem from its long tradition of employing physically handicapped persons — one it has maintained since its foundation in 1968. Today, more than 800 people work at Atena Corporation and its associated businesses.

As an extension of our direct mail media business, we have also begun to transform into a total physical distribution service by offering a sales promotion service that incorporates direct mail, product catalogues, pamphlets and point-of-purchase sales promotion materials, premium service SP items, as well as the main products themselves.

Our clients include major publishing companies, breweries, food and health supplement suppliers, medical equipment, automobile, camera, precision equipment, office machine and home appliance manufacturers, financing, insurance and credit businesses, communication carriers, consumer mail order businesses, aircraft carriers, department stores and logistics businesses in the private sector as well as public organizations such as governments and chambers of commerce and industry. The number of regular clients already exceeds 150 companies.

Our Head Office premises include 10,000 m² of office space, as well as an additional 16,500 m² that includes a mailing machine factory, computer facility space, offline printing center, call center and fulfillment center. In May 2007, we integrated our Tokyo-area distribution offices — previously at three different locations — into a single new Distribution Center measuring 28,380 m² in Makuhari, Chiba. Together with the 6,600m² Distribution Center in Osaka in Western Japan, this gives us two state-of-the-art distribution centers that effectively cover the entire country.

We have installed a functional outsourcing system composed of 500 network system machines and terminals in the two centers, which are operated by about 500 employees including distribution staff and other personnel.

Our most unique service — one that none of our competitors offers — is the flag ceremony service. Ever since Atena was first established, we have provided comprehensive flag-related services including sales, rental and hoisting of the flags of Japan and other countries used at receptions for foreign dignitaries visiting Japan in association with the Japanese Ministry of Foreign Affairs, as well as at major international events like World Expo and international sports events held in Japan.

Our flag ceremony service began with the provision of national flags for Osaka Expo 1970, and has continued ever since. Most of the national flags used in major Japanese national events such as Aichi Expo 2005 and the five Summit Conferences held in Japan ,and also Beijing Olympic Games in August 2008 and Expo 2010 in Shanghai,Chaina all been provided by Atena.

In 2006, we founded a local subsidiary in Shanghai, China, the first in our industry to do so. By applying the same business model as used in Japan, we have rapidly expanded our operations for clients who are mainly the local subsidiaries of Japanese businesses. More recently, we have expanded our target to include local (Chinese) businesses that are interested in our business models for mail order sales of high-tech electrical appliances, fashionable clothing, and sophisticated products for general consumers as well as other Chinese businesses.

Since the introduction of the Japanese Personal Information Protection Law in 2006, we at Atena, have begun developing an innovation strategy, aiming at provision of DM and SP business solution services based on higher security and quality. We are also planning to improve our business results by building a reputation as a reliable outsourcer capable of contributing to our clients' CRM and by absorbing cost burdens above the industry standard. At Atena, we are also committed to enhancing our contribution to society by assuming the social responsibilities required of a private business.

"Security and High Quality – These are the Missions of Atena."

TAMURA CORPORATION

From the foundation of Tamura Corporation in 1924 to this present day and age in which we find ourselves expanding our operations into evermore global fields, the mission of our group has not changed. We will always strive "to contribute to society by producing excellent products."

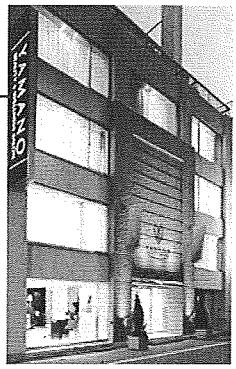

Tamura Corporation's head office is located in Nerima-ku, Tokyo and employs about 8,000 people world-wide. Our business consists of the 3 main sectors. The first one is "Electronic components" and it deals with transformers, power supplies, LEDs, etc. The second one is "Electronic chemicals and FA systems," and the third one is "Information equipment."
We are involved in everything from material development to systems development in a global market!

The Tamura Group will do what only we can do to meet the world's cry for next-generation technology. Expect great things from the Tamura Group in the future, as we assume our identity as "your one and only company," helping to preserve the world's environment while supporting society's information revolution.

WORLD CHEMIAL CO.,LTD.

Since its establishment in 1971, we, WORLD CHEMICAL CO., LTD., have been progressed by being committed to the creation of "original" technologies at all times. And this commitment led us to gain unique and significant position in both chemical pump and oil collecting system industries.

Our technology creation begins with understanding customers' situations and recognizing their needs. Once their needs are clarified, we discover the best solution and put it into practical use with our unique technologies. We surely believe our communication skills to understand the needs, inspirations with great creativities and technological capabilities for practical applications are our originality and great advantage.

In such product development process, we have to remember there is no "finished products" in our products. Customers' requests keep changing from day to day, and technological advancements never end. Therefore, to make customers more satisfied, we continue to modify and improve our currently available products, and advance to much more suitable products to the ever-changing customers' needs.

Moreover, in the circumstances where borderlessness is accelerating and true international competitiveness is being concerned, we should embark on the road of internationalization with solid guidelines. In my view, true internationalization does not simply mean to import original technologies cultivated in Japanese market to overseas. By combining technologies of our company with another country by adopting what is unique to each, such as productivity, parts and raw materials, the country becomes the source of the product. This means products can be accepted as country's originals to its market, not as exported products from Japan. I strongly believe such localization by a horizontal division of labor will play a major role in internationalization.

We, WORLD CHEMICAL CO., LTD., will continue every effort to make a solid contribution with our unique technologies to industry, society and global environment, both domestically and internationally. We will greatly appreciate your continuous support and encouragement.

Luceo Co., Ltd.

Luceo Co., Ltd. Is since 1966 establishment, and it is a manufacturer POLAX, RETAX in-house, etc. many high-quality optical instrument speciality. Luceo's creative development force which has produced the new optical products as optical measuring instruments, optical filters, optical components and optical sensor units, and sophisticated technology force have got the evaluation which is high from many customers.

21th century, we are the manufacturers which consider the quality at first, and the product of the quality of the world standard keeps be offered in the world.

"The products which the customer needs from good workshop are made, and the contribution is made to be society" is raised in the enterprise philosophy, and we received Certification of ISO9001, and we are growing to the enterprise which suits the new age. We always aim at development of ability, and then, we offer the good products by having enthusiasm and ingenuity and sincerity. We are making efforts in order to become an useful enterprise for the customer.

Mitsubishi Chemical Corporation

Mitsubishi Chemical Corporation and Mitsubishi Pharma Corporation established a holding company, Mitsubishi Chemical Holdings Corporation (MCHC) in October 2005. Since then, both companies have become the wholly owned subsidiaries of MCHC, and both have started the operations of the MCHC Group.
