4th Edition

Certification Training Program on

CARBON MARKETS

09-10, December 2026 **Navi Mumbai**

Program Overview

The proficiency course is crafted to bridge the critical intersection between regulatory policy, financial appraisal, and commercial project execution. This edition moves beyond foundational compliance to prioritize the operationalization of Article 6 alongside the rollout of India's Carbon Credit Trading Scheme (CCTS). It places strong emphasis on investment viability and financial additionality, equipping professionals to model IRR, evaluate NPV benchmarks, and draft bankable Project Design Documents (PDDs) across technology and nature-based interventions. The program enables decision-makers to convert statutory understanding into on-ground project execution, leveraging innovative carbon financing, offtake mechanisms, and domestic compliance drivers to advance corporate climate action.

Course Highlights

Deconstruct Global Regulatory Ecosystems: Gain a 360° understanding of carbon market mechanisms, establishing clear operational clarity between compliance regimes and leading voluntary registries (Verra, Gold Standard, ACR, Plan Vivo).

Execute Bilateral & Article 6 Frameworks: Demystify Article 6.2 and 6.4 governance, the operational Rulebook, Corresponding Adjustments (CAs), NDC accounting, and the strategic transition of legacy CDM assets..

Optimize for Domestic Compliance (CCTS): Strategically align with India's evolving Carbon Credit Trading Scheme, identifying statutory mandates for obligated entities and monetization pathways for non-obligated sectors.

Appraise Investment Viability & Additionality: Master practical financial evaluation tools, analyzing Internal Rate of Return (IRR), Net Present Value (NPV), and cash flow dynamics to substantiate project additionality and bankability.

Author Bankable Project Design Documents: Develop hands-on competence to lead the complete carbon asset cycle, mastering PDD structuring, methodology selection, and validation protocols for tech and nature-based solutions.

Structure Carbon Finance & Offtake Deals: Explore emerging commercial models, forward purchase agreements, debt-equity participation, and risk-adjusted pricing to monetize carbon assets effectively.

Training Partner

GC Advisory

Learn from Carbon Market Veterans & Technical Authorities who command over 40 years of collective cross-sectoral expertise in strategic advisory, financial modeling, and the commercial monetization of bankable decarbonization projects.

Delegate Fee - Rs 35,000 + taxes
