

Estimation of Measurement Uncertainty in Test and Calibration

Organized by
FICCI QUALITY FORUM
Aug. 6-8, 2013

Federation House, New Delhi

1. Introduction

The purpose of measurement is to determine a value of quantity of interest or the measurand. However, when any measurement is made, the measurement process involves the use of standards, work piece, instruments, persons, procedure and environment.

For reliable measurement process, it is necessary to quantify this inherent variation, which is known as the uncertainty of measurement. It is, thus, necessary to not only to understand what measurement uncertainty is, but to learn how to estimate the same and consider its implication in decision based on measurement.

2. Course Objectives

The main objective of this course is:

- ✓ To understand the concept of measurement uncertainty and its implication in measurement
- ✓ To learn how to estimate the uncertainty associated with measurement results of tests & calibration.
- ✓ To practice the estimation techniques through a workshop with live examples so that a participant can perform the calculation at his/her work station.

3. You should attend this course if,

- ✓ You want to understand the concept of measurement uncertainty.
- ✓ You want to implement concept of measurement uncertainty in measurement procedures exercise in your testing and calibration laboratories.
- ✓ You want to learn to estimate uncertainty associated with measurement results of test and calibration.
- ✓ You want to practice estimation techniques for improving efficiency of your laboratory processes
- ✓ You are looking to expand your skills in the area of good laboratory practices.

4. Course Material

Course kit comprising detailed course material with several worked out examples which will help participants in estimation of Measurement Uncertainty in their tests.

5. Methodology & Certification

A judicious mix of class room presentations, exercises, group discussion, case studies and hands-on practice will be used. Participants will be encouraged to relate the learning to live situations.

Participants who successfully complete the continuous assessment during the course and also the written examination conducted on 3rd day of the course will be issued a certificate by FICCI.

6. Course organisation, schedule & registration procedure

The course is of non-residential nature. It is of 3 days duration and is conducted from 0900 hrs to 1730 hrs daily for the first three days & on the third day the course finishes at 1700 hrs after the written examination. Tea/Coffee and working lunch is provided by the organizers.

The fee for the course is Rs 10,500/- per participant plus 12.36% Service Tax (Total Rs 11,798/-)

For joining the course, participants are required to send their full particulars (name, designation, email, postal address, and phone number) along with fee by RTGS or cheque payable at Delhi in favour of "FICCI QUALITY FORUM" at the address mentioned under Course Venue.

7. About our Lead Faculty

Our Lead faculty of this course Mr. Basudev Bhattacharya has rich experience of 43 years in the field of designing, functioning, & managing testing laboratories. He was one of the founder members of Pilot Test House of the Government of India, Ministry of Commerce, a premier test and calibration centre for testing export product

from the country.

Mr Bhattacharya was trained on Laboratory Management in UK in 1988 under the Indo-EEC Co-operation. He has been an International consultant in the field of laboratory accreditation on behalf of International Trade Centre; a Geneva based UN Agency. He was Chairman of Technical Committee on Photometry of NABL and member of the NABL technical committees on Clinical & Food Testing Laboratories.

He has presented and published more than 30 papers on a variety of technical subjects in National and International Journals, seminars and conferences. He has conducted more than 150 in-house workshops and training programmes on LMS in India, Bangladesh, Mauritius, Dubai, Abu Dhabi & Kuwait, and has trained more than 2000 persons. He has been providing auditing services to accredited laboratories and certified organizations as per ISO/IEC 17025, ISO 15189 & ISO 9001 Standards. and has conducted more than 75 such audits.

He has also provided LMS implementation support to 13 laboratories in different disciplines (viz. Chemical, Clinical, Mechanical, Electrical testing etc and Calibration of Mass-Dimension-Thermal-Pressure which have successfully achieved NABL accreditation.

8. About FICCI Quality Forum

FICCI Quality Forum (FQF) is a specialized division of Federation of Indian Chambers of Commerce and Industry (FICCI) set up with objective to sharpen the competitive edge of Indian Industry. FQF provides training, consultancy and research services focused on enhancing the quality quotient of clients and partner organization.

For the past 20 years, FQF is providing training on various ISO management systems and has a pool of highly competent & experienced trainers to conduct training courses.

FQF has collaboration arrangements with Nigel Bauer and Associates, UK for providing IRCA, UK approved Auditor/Lead Auditor training courses on ISO 9001 Quality Management System (QMS)

ISO 14001 Environment Management System (EMS), ISO 22000 Food Safety Management System (FSMS) and Occupational Health and Safety Management System (OHSAS) 18001 standards. A summary of feedback given by past participants of these courses is included in this brochure.

In addition we also provide training on Six Sigma Green and Black belt certification, and Project Management. We also provide consultancy support on effective implementation of above management systems including LMS leading to certification/accreditation.

9. Course Dates

August 6-8, 2013

10. Course Venue

Federation of Indian Chambers of Commerce & Industry (FICCI),

Federation House,

1 Tansen Marg, Near Mandi House

New Delhi –110001, India

<p>11. Course Content</p> <ul style="list-style-type: none"> • Fundamentals of Measurement • Concept of Measurement Uncertainty • Method of Estimation of Measurement Uncertainty as per ISO Guide of 1995 • Basics of Statistics as applicable to estimation of measurement uncertainty • <i>Syndicated Exercise on estimation of type-A & type-B evaluations</i> • Case Studies involving Test situations • Case Studies involving Calibration situations • Model for estimation of measurement uncertainty in testing • Model for estimation of measurement uncertainty in calibration • <i>Workshop on estimation of measurement uncertainty in physical and chemical measurements</i> • <i>Workshop on estimation of measurement uncertainty in Calibration of common parameters</i> • Method of estimation of Measurement Uncertainty in Microbiology as per ISO 19036 • <i>Syndicated Exercise on estimation uncertainty associated with quantitative microbiological measurements</i> • Application of Measurement Uncertainty in testing & calibration • Asia Pacific Laboratory Accreditation Cooperation (APLAC)'s interpretation of estimation of MU in calibration & testing • Development of a Standard Operating Procedure (SOP) for the estimation of measurement uncertainty 	<p><u>Some Comments from participants of ISO Training Programs conducted by FICCI</u></p> <ul style="list-style-type: none"> ▪ The course and the manner in which it was delivered certainly deserve high grades on the scale. It has gone beyond what I had actually expected before being part of it. ▪ The friendly and tension free environment created by the trainers. ▪ Calmness of trainers in answering all the queries. ▪ The learning that comes with each course is always good but the way it is given is really important. The Course material/learning were very well disseminated and the ease with which I could learn was good. I enjoyed learning. ▪ I had wonderful experience which is full of knowledge and information which will not only help in my professional life but also personal life. ▪ Programme was very good especially both faculties were extremely good having full knowledge about the concept. ▪ Through this course, I got more benefit. Before this course my knowledge on quality management and auditing were zero. But now I can say I am having more knowledge. ▪ The structured methodology and experience and expertise level of the faculty. ▪ Ample time being given to every clause of the standard. ▪ Training material was very clear and sequential methodology was conducive to learning. ▪ The Role Play-Audit, Exercises in groups & individual assignments. ▪ The deliberations by the Lead Faculty were the best thing. His pace & pitch during the entire course was constant which led to good learning. ▪ Lively presentation, healthy interaction and professional approach. ▪ Teaching method was excellent. Still can't believe that whole ISO 9001:2008 covered and understood so well in 5 days.
