INDUSTRY OVERVIEW

Plastics industry has been making significant contributions to the economic development of the nation. It provides employment opportunities for above 3.3 million. Their versatilities therefore allow plastics to be used in wide sectors such as Automobile, Construction, Electronics, Agriculture, Packaging, etc. The sector is important for the national economy with huge scope for growth, but at the same time it faces sustainability challenges.

Expected Demand of Plastics in India (MnMTA)

SUSTAINABILITY CONCERNS

While the usage and benefits of plastics are manifold, it invariably gets branded as environmentally damaging as it is non-biodegradable. In order to be competitive in the international market, the Indian plastics industry in the coming decades has to promote sustainable development by investing in technology that protects environment and stimulates growth while balancing economic needs and financial constraints. Therefore, even though plastics score high on parameters such as protection, preservation, consumer convenience; but its recyclability still remains a prominent issue. Plastic Waste management has also been a challenge.

WHO SHOULD PARTICIPATE

- Chief Executive Officers/Consultants/Marketing Professionals/Head R&D/Policy Makers/Prospective investors/Entrepreneurs/ Academic/Financial Institutions/civic society reps.

ABOUT THE EVENT

Beginning 2011, this is the third series of Poly India event organized jointly by FICCI with Department of Chemicals & Petrochemicals, Govt. of India and Central Institute of Plastics Engineering & Technology (CIPET)
