

# “Role of Technology in Strengthening Quality Systems”

## & 7th FICCI Quality Systems Excellence Awards for Industry

24th April 2019, Federation House, New Delhi

### INTRODUCTION

Indian manufacturing industry is drifting from physical to an increasingly automated & technology driven ecosystem. Technologies and systems such as automation, cloud computing, Internet of Things among others are acting as the key pillars of this ecosystem. These technologies are changing the face of industry in ways that were unimaginable a few years ago. These technologies have already spurred and resulted in exorbitant innovations in the form of speed, customization, precision and efficiency across the industrial sector. Implementing these technologies can streamline the relationships with suppliers and customers and also achieve new levels of collaboration. These technologies are also playing a major role in improving quality systems.

With this objective, FICCI presents a forum where experts from the field of quality and technology across varied sectors like Manufacturing, Power, Mining, Construction & Infrastructure would share their best practices and innovative solutions for improving the business performances.

FICCI would be conducting its 7<sup>th</sup> edition of FICCI Quality Systems Excellence Awards for Industry on 24<sup>th</sup> April 2019 in Federation House, New Delhi.
