FICCI's LEARNING MISSION ON MANUFACTURING EXCELLENCE

7th November 2024, Chennai

FICCI Tamil Nadu State Council organized a Learning Mission on Manufacturing Excellence on **7th November 2024**, Chennai. The mission included visits to **Wheels India Limited** and **Daimler India Commercial Vehicles, Oragadam**, and was attended by 20 representatives from Brakes India, Lucas TVS, Renold Chain India, Saint Gobain, SFL, Ashok Leyland and Phoenix Medical Systems. The primary objective was to gain firsthand insights and knowledge of the best manufacturing practices employed by leading industries.

The mission's primary objective was to obtain firsthand insights and knowledge regarding the best manufacturing practices employed by industry leaders. The program included a plant tour, a presentation highlighting the company's best practices, and interactions with key organizational officials. This visit provided participants with a practical understanding of the methods used to implement these practices across various sectors.

The factory tours served as a valuable benchmarking opportunity, demonstrating the companies' dedication to adopting the latest technological advancements and remaining attuned to global trends in the automotive industry. Their commitment to delivering comprehensive, client-focused services has secured their strong reputation for customer satisfaction. The observed success of these organizations is attributed to their operational effectiveness and adherence to core principles, as well as their ability to optimize processes to enhance efficiency and reduce errors.
