CEA BRAINSTORMING EVENT

MAKING INDIAN POWER SECTOR AI ENABLED

on the occasion of 53rd FOUNDATION DAY OF CEA

October 14-15, 2026
Manekshaw Centre, Parade Road, New Delhi

About The Event

The power sector is one of the most critical components of infrastructure, essential for economic growth, industrial competitiveness, and improved living standards. India has made significant strides in the sector, including near-universal electricity access, reduced power deficits, and rapid expansion of renewable energy capacity.

The global power sector is undergoing a profound transformation, driven by the rise of renewables, electrification of transport and industry, data centre proliferation, and the urgent need to decarbonise. At the centre of this transformation is Artificial Intelligence (AI), which is rapidly reshaping how power systems are planned, operated and optimised, enabling real-time demand forecasting, predictive maintenance, intelligent energy dispatch and machine-speed decision-making.

In this context, the Central Electricity Authority (CEA) is organising an International Conference-cum-Exhibition on "Making Indian Power Sector AI Enabled" on October 14-15, 2026 in New Delhi. The event brings together policymakers, government leaders, regulators, industry leaders, experts, investors, innovators, academia and technology providers to deliberate on a concrete roadmap for AI integration across the Indian power sector.

The event aims to catalyse AI-led transformation of the Indian power sector by identifying actionable use cases, enabling policy and investment pathways, showcasing cutting-edge solutions, and fostering collaboration across government, utilities, industry, academia and technology providers. The Conference and Exhibition will provide a platform for knowledge exchange, technology showcasing, networking and collaboration towards building a smarter, more resilient, efficient and future-ready power system.

KEY HIGHLIGHTS

10+ SESSIONS
Technical & policy discussions with leading experts from India & overseas

20+ EXHIBITORS
AI technologies and cutting-edge solutions across the power sector

1000+ DELEGATES
Indian & international policymakers, industry leaders, experts & stakeholders

GLOBAL COLLABORATION
Platform to foster partnerships, investments, innovation and cross-border cooperation
